

SAPCA Technical Meeting 2018

LED Lighting FAQ

- Is LED lighting getting cheaper?
- Is it becoming more efficient?
- How does the quality of the light compare to metal halide?
- What are the key issues if upgrading an existing system to LED?
- How easy is it to control light pollution, compared to metal halide?

- What are the projected cost savings using LED lighting, and are they accurate?
- What are the potential, lifetime cost savings against metal halide and does this make LED viable?
- Can LED lights be dimmed effectively?
- What are the ecological advantages of LED lighting?
- Do sports governing bodies and other funders support LED lighting projects?

What can we expect in the future???
